REECE LUCAS
FRONT END DEVELOPER

Employment

Consultant Developer at Deloitte Digital

06/17 – Present

Worked as part of a multi-disciplinary team on a large multi-national E-commerce platform. Oversaw a comprehensive code audit and performance review and presented regularly to stakeholders. Planned a detailed approach for re-factor with a view to addressing issues with scalability, maintainability, accessibility and test coverage.

Lead Front End Developer at Collective London

11/14 – 05/17

Led a small front-end team responsible for the UI development of builds that ranged from responsive micro-sites to large legacy projects. Utilised modern work-flows including Grunt/Gulp/Wepback, BEM/ITCSS (in SASS and PostCSS), and version control via Git. Worked according to agile methodologies within teams internally and client side. Collaborated with art directors, project managers and designers to encourage the adoption of design practices and work-flows that prioritized performance and accessibility.

UX Research & Design at Meta

11/13 - 08/14

Conducted user research and designed UI changes to address usability 'pain points'. Created functional prototypes for small-scale A/B testing. Worked in a fast-paced environment in diverse, agile teams. Like all startups, time constraints were tight and responsibilities were varied, requiring a flexible approach and readiness to learn skills outside of the typical remit of a Front End Developer.

Education

Physiological Science – BSc.
First Class Honors
University of Bristol
